

Peter Johnsson

Peter is a key member of Hyder Consulting's Diagnostic & Remedial Engineering Group. He has over 10 years experience in the investigation and repair of buildings and civil structures and takes a lead role in many of the groups larger projects. His major areas of experience are the investigation, repair and protection of reinforced concrete structures and the conservation of heritage facades. His expertise covers façade inspections, condition assessments, diagnostic testing (NDT) techniques, materials selection, development of remedial, repair and conservation strategies, repair specification, contract documentation, superintendence of repair projects and project management. Peter is the Vice President of the Australian Concrete Repair Association (ACRA) and was President in 2006 and 2007.
