

Paul Connett

Paul Connett is a structural engineer who has worked in the United Kingdom and in Australia. He has 27 years experience as a practising structural engineer and has for the past 21 years specialised in the assessment, conservation, economic recycling and repair of historic buildings and structures. He joined Hughes Trueman Consulting Engineers, Sydney in 2003 from his previous position as a Principal Engineer with Cameron Taylor Bedford, London. He was appointed an Associate Director of Hughes Trueman in 2005. He is currently the structural engineer representative on the NSW Department of Planning Heritage Branch Technical Advisory Group (TAG).
